It is with pleasure that we can report on the great efforts made by the members of the VSH Community Fund project team in collaboration with VSH United Group to identify those institutions that were eligible for financial donations for improving their infrastructure and/or support equipment in providing services to the Suriname Community. Our VSH personnel and family are an important factor in our success and at this special 60th anniversary we treated our VSH kids on a educational event during the "Pinkster" Holiday at the kids museum "Villa Zapakara". VSH also paid for music lessons for a number of VSH kids at National Public Music School, giving them a chance to develop themselves in music. By upgrading the canteen facility we stimulate a healthy lifestyle and an environment to enjoy a stress-free lunchbreak. The 60th anniversary year was closed off with a special **Giving Back** party allowing all VSH personnel with their partners to celebrate this special year and to give thanks to the success of VSH team exceptional contribution.

04 Suriname

Suriname is a country of 163,270 square kilometers situated on the northeast shoulder of South America and home of the VSH Group. While a Babylonian profusion of some seven languages are in everyday use, the official language is Dutch.

The population of some 530,300 souls is one of the most polyglot in the world and includes indigenous Indians, African descendants, Hindustanis, Javanese, Chinese, Lebanese, Jews and Europeans. Recent arrivals include Brazilians and so called new Chinese. Almost half of the population is concentrated in and around the capital city Paramaribo.

Suriname has a strong democratic tradition dating back some 145 years. Legislative powers are in the hands of the National Assembly composed of 51 members elected by popular vote for a period of five years. The President is the head of government and is elected for five years by a two thirds majority vote in the National Assembly or by a common majority vote in the United Peoples Assembly comprised of national, regional and municipal representatives. The Council of Ministers chaired by the Vice President consists of 17 member ministers and exercises the highest executive and administrative power.

Mining is the backbone of the economy. Gold is mined in large, medium and small scale operations and provides employment to hinterland communities and migrant workers from Brazil.

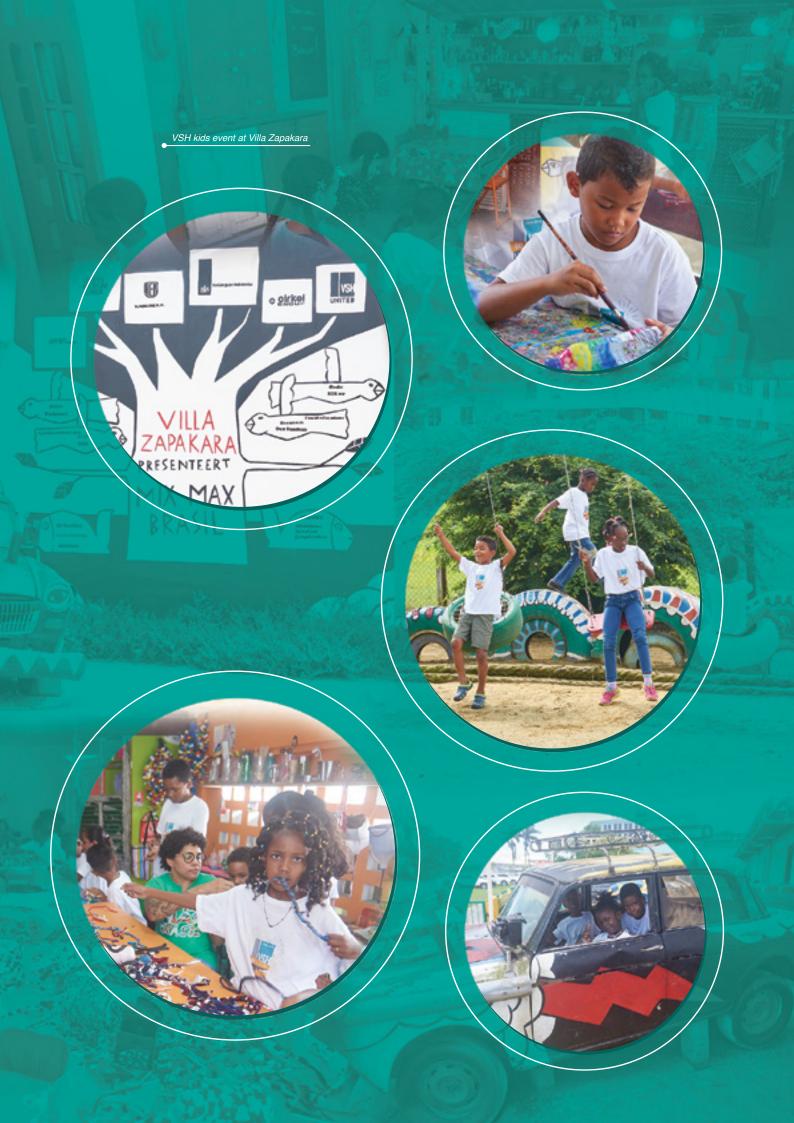

Crude oil production and refining contributes significantly to the fuel requirements of industry and electric power generation.

Energy requirements are further complemented by a hydroelectric dam located 90 km south of Paramaribo.

Rice, bananas, shrimp, fish and timber comprise the other traditional export products.

Suriname is the proud guardian of one of the largest expanses of pristine tropical rainforests in the world. The Central Suriname Nature Reserve (1.6 million hectares) is the largest of 15 protected areas encompassing 12% of the total land surface of the country.

Since its establishment in 1958 the VSH Group has grown steadily and is well positioned to participate in the further development of this young nation.

05 Growing outside of Suriname

Florida, USA, 2001

Taking advantage of Florida's business-friendly legislation, favorable tax climate and its geographical proximity to the Caribbean and

South American, we commenced operations in Miami, Florida in October of 2001, offering air- and ocean freight services to and from Suriname. Florida is not only the top travel destination in the world. The Sunshine State also relies heavily on international trade, agriculture, aerospace and aviation, and the life sciences. As of 2015, Florida has the fourth largest economy in the USA with a real gross domestic product (GDP) of USD 840 billion and a USD 77 billion budget. Florida is home to the nation's 2nd largest foreign trade zone network. The overwhelming share of Florida's trade moves to and from Latin America and the Caribbean, through the state's seaports and airports. Most of these movements are intermodal in nature, requiring also a highway and/or rail connection. The nominal value of exports and imports leaving from and coming to Florida has more than quadrupled over the last 20 years. Trade with Asia and Latin America is expected to increase, and improvements to the Panama and Suez Canals will allow a larger share of trade to move directly to Florida.

Georgetown, Guyana, 2015

VSH-UNITED (Guyana) Inc. was established in Georgetown Guyana in November of 2015. This addition to the VSH Group of Companies is

an extension of our VSH Trading activities specialized in personal protective equipment. Additionally, VSH-UNITED (Guyana) provides sales and marketing support to VSH Steel and VSH-United (USA), reflecting our "boots on the ground concept". Much like Suriname, our neighbor Guyana has had a history of petroleum exploration since the 1940s. Guyana gained worldwide attention in May of 2015 when Exxon Mobil announced discovery of oil in the Liza-1 well, followed by Payara, Liza deep, Snoek, Turbot, Ranger and Pacora by early 2018. For a country of 750.000 people, the find changes everything. Within a decade Guyana will be completely transformed through economic growth.

The Co-Operative Republic of Guyana is a sovereign State on the northern mainland of South America. Guyana is bordered by the Atlantic Ocean to the north, Brazil to the south and southwest, Suriname to the east and Venezuela to the west. The official language is English. Guyana is part of the Anglophone Caribbean and member of CARICOM (Caribbean Community). CARICOM's main objective is to promote economic integration and cooperation among its members with a regional single market. The secretariat headquarters is in Georgetown, Guyana. CARICOM is an official United Nations Observer. In 2008, Guyana joined the Union of South American Nations as a founding member.

Moerdijk, the Netherlands, 2018 Due to recent oil finds off the coast of Guyana and the likely future discovery off the coast of Suriname, the

Suriname/Guyana region required a strong VSH EU branch. Consequently, we commenced operations in Moerdijk, the Netherlands, in January 2018. Various offshore service providers from Europe have been contracted for Guyana. VSH United is now the majority shareholder in a strategic and efficient NVOCC company/warehouse that is specialized in the Dutch Caribbean and will be able to support NVOCC development targeting Suriname/Guyana.

The Netherlands is located in Western Europe with a population of seventeen million. It forms a constituent country of the Kingdom of the Netherlands with three island territories (Bonaire, Sint Eustatius and Saba) and three constituent countries (Aruba, Curaçao and Sint Maarten) in the Caribbean. Suriname was Dutch territory until 1975, hence the trade connection. The European portion of the Netherlands borders Germany, Belgium, and the North Sea, sharing maritime borders in the North Sea with Belgium, the United Kingdom, and Germany. The Port of Rotterdam is the largest port in Europe, located in the city of Rotterdam, Netherlands. Until 2004 it was the world's busiest port. In 2011, the port of Rotterdam was the world's eleventh largest container port in terms of twenty-foot equivalent units (TEU) handled. In 2012 Rotterdam was the world's sixthlargest port in terms of annual cargo tonnage. The port of Rotterdam is mostly dependent on the petrochemical industry and general cargo transshipment handlings. The harbor functions as an important transit point for transport of bulk and other goods between the European continent and other parts of the world.

Introduction

In the past sixty years the VSH United Group of Companies has grown to become one of the most diversified groups in Suriname. The company celebrated its 60th anniversary on August 26, 2018, the date of incorporation of the first Company of what has now become VSH United Group. Expansion ambitions saw the company establish subsidiaries in Miami, U.S.A. (2001), Georgetown, Guyana (2015) and Moerdijk, the Netherlands (2018). The Group's major activities include ship agency, freight forwarding, port terminal operations, offshore support, trading, manufacturing, real estate development and management. Through our associated company and our strategic investment VSH United is involved in the insurance and hotel business.

VSH United

Group results for the year 2018 were higher in comparison to the year 2017. Revenue from all segments improved. Revenue from associate and investments saw a decline in 2018 compared to 2017.

At the Annual General Meeting of Shareholders held on 6 July 2018 the financial statement 2017 and a dividend of SRD 5,263,796 or SRD 2.65 per share of nominal SRD 0.10 were approved.

The year 2018 was the third year of the Strategic Long-term Plan 2016-2021. In line with our long-term strategic professionalization objective we continued with the contracted services of an Exact software consultant to provide onsite expertise to improve use of the licensed Exact administrative modules. In addition individual companies implemented various other "smart" software/production systems to improve business processes. With the further implementation of the Strategic Long-term Plan 2016-2021 of regional dominance VSH Real Estate established a subsidiary VSH Real Estate Guyana. Also, as mentioned in the Notes to the Financial Statements annual report 2017- "events after reporting date", VSH-United (Nederland) B.V. was established in December 2017 to facilitate the acquisition of majority shares in I.F.C. Holding B.V. per 1 January 2018, an existing company in the Netherlands. We can report that the of I.F.C. Holding B.V. subsidiaries I.F.C. International Freight (Caribbean) B.V. and IFC Vastgoed B.V., produced better than expected results. Our subsidiary VSH-UNITED (Guyana) Inc. continued to underperform and a change in business strategy was executed in 2018 (see segment Trading for more information). The manufacturing companies reported an increase in export but under budgeted volumes.

The **VSH Corporate Governance Code** is an integral part of the Group's Management policy. The Code and related Internal Audit/IT Charter were reviewed on 14 February 2019 and no changes were made. In line with international audit compliance

requirements VSH United (Holding) was **TRACE certified** in 2018. TRACE is a globally recognized anti-bribery business organization and leading provider of third-party risk management solutions. Trace membership helps companies conduct business ethically and in compliance with U.S. Foreign Corrupt practices Act, U.K. Bribery Act and other anti-bribery legislation.

The Business Environment

The Suriname economy/GDP grew by 2.0%* (2017: 1.2%) in 2018 as a result of relatively stable commodity prices for key exports in the oil and mining industry. This modest growth and a relatively stable currency SRD 7.60 (2017: SRD 7.50) kept inflation at its lowest level 5.4%** in 3 years (2017: 9.2%, 2016: 52.4%).

Continued high government expenditures, financed for the most part by loans from international financial institutions are increasing the already high budget. No efforts have been made to improve government tax collections and dependence on income from volatile mineral resources continues to effect real economic growth.

Weak import (value of goods) controls, poorly implemented government quality standards and conflicting import versus local production policies are undermining non-mineral manufacturing activities. Discussions about supporting increased non-mineral production efforts to stimulate economic diversification have again not materialized in effective policy in 2018.

Production from the Newmont gold mining project at Nassau in eastern Suriname continues to report better than expected gold production. lamgold Saramacca mine expansion investment is in progress and is expected to start supplying the existing mill with ore in the second half of 2019.

State Oil has indicated that the year 2018 will be closed with positive results. Improved performance came for the most part from downstream subsidiaries and income from their interest in the gold mine of Newmont Suriname. Efforts to improve production from the oil fields in Saramacca are ongoing while near shore drilling activities are scheduled for 2019. The refinery performance is dependent on crude oil supplies from the Saramacca on-shore production wells and anticipated nearshore oil reserves. Exploration activities offshore in 2018 were not successful but expectations from the now thirteen offshore oil finds in neighboring Guyana and increased Suriname basin research data are fueling the drive for further Suriname offshore exploration programs.

FAI - Food and Agriculture Industries N.V.- continues to struggle with decreased banana production levels (down by +/- 40%) due to the so-called Moko disease affecting the banana plants. Efforts are ongoing to contain the spread of the disease while alternative crops are being explored.

In the air transport sector, overall passenger arrivals via Johan Adolf Pengel International Airport increased by 18%* in 2018 compared to 2017. Additionally the international air travel via the smaller local airport at "Zorg en Hoop" continues to increase, +/-22%* 2018 versus 2017 indicating increased interest by Suriname Companies to tap into business opportunities, as a result of major crude oil discoveries in Guyana. Other ports of entry at Albina en Nickerie continues to see increased passenger movements. Tourism remains the leading sector that offers growth opportunities for economic diversification.

N.V. Havenbeheer Suriname reported a 10% increase in incoming full container volumes which can for the most part be contributed to imports related to the oil and mining industry. The lamgold Saramacca mine expansion project contributed to this increase. The reported 6% increase in full containers outwards, relates to an increase in the export of round logs. Services operated by EUKOR Car Carriers, Seaboard Marine, Intermarine, Seatrade, Atlantic Feeder Service (AFS), Hamburg Sud, Maersk Line and Sealand offer worldwide reliable shipping options within the group and in-house custom brokerage services complements our one-stop-shop logistics approach. This business model supported cargo market share volume growth and increase in cargo handling revenue generating activities. Total number of cargo vessels handled in 2018 was 371 (2017: 346).

One offshore project was supported with services in the period May till November 2018. A near-shore support services tender submission was not successful and from lessons learned our strategy is being reviewed and will be adapted for future tenders. VSH Transport will continue to invest in shore base capacity and services to ensure success in this highly competitive bidding environment.

Risk Management - VSH Shipping and VSH Transport are ISO 9001:2015/14001:2015 certified. In October 2018 an audit took place and the companies were successfully re-certified. In addition VSH Transport was also re-certified in OSHAS 28001 - safety standards in the work place. These certifications address the operational and environmental risks. Yearly internal appraisals enhance maritime industry risks discussion and mitigation. VSH United (Holding) is Trace certified which completes compliance requirements to allow effective participation in international logistical support bidding processes.

The segment operating result amounted to SRD 46,871,164 (2017: SRD 25,028,843). Continued investments in modern terminal equipment, upgraded software systems, personnel training and terminal expansion is required to maintain volume growth and increase efficiency. VSH-United (USA) L.L.C. (Miami) and IFC (Moerdijk) cargo consolidation services will support sister company VSH-UNITED (Guyana) Inc. efforts to expand market share in the anticipated growth of the Guyana cargo market driven by the offshore industry sector.

Trading

N.V. VSH Trading is the distributor for Canon office equipment in Suriname and holds an important share of the market for copiers, printers and scanners. Attempts to expand into the Guyana SOHO (Small Office Home Office) equipment market with sister company **VSH-UNITED (Guyana) Inc.** were not successful and sales were terminated in 2018. We can add that there is an official Canon office equipment (copiers) dealer in Guyana which prohibits sale of copiers by VSH-UNITED (Guyana). Both companies are official distributors for Red Wing products, and they supply major industries with quality footwear for the workplace. A full line of Personal Protective Equipment (PPE) complements the assortment available to customers.

Trading operating income is stated after deduction of cost of goods sold. Operating income was higher and amounted to SRD 9,325,105 (2017: SRD 6,783,768). Segment operating result amounted to a loss of SRD 671,183 (2017: loss SRD 1,252,421).

Increased Trading segment operating income was generated by an increase in Suriname market sales by VSH Trading and an increase in resale items at VSH Steel. As reported earlier, VSH-UNITED (Guyana) continued to underperform in 2018 and a change in business strategy was executed. The startup business model of targeting the wider Guyana market with safety shoes/PPE/office equipment sales combined with sales support for VSH-United (USA) cargo consolidation services and sales for VSH Steel products was streamlined. Anticipated market growth driven by the developing oil industry in the Guyana started to materialize in the second half of 2018. The Liza Phase 1 oil field development is on track to start production in 2020. A large influx of expats brought in by the many offshore contracting companies have set-up offices and shore base infrastructure, all signaling increased demand for safety shoes and PPE supplies. Significant shore-side investments by local and international oil industry service companies supported a more focused business to business sales strategy in safety shoes/PPE targeting specific companies. Improved sales talking points were used to target other local business, Government owned utilities, infrastructure and maritime related companies in promoting the benefits of sourcing quality safety shoes/PPE products with warranty conditions. Finally, a more aggressive business to business sales effort was implemented to grow sales volumes targeting the established mining companies.

Overall sales of safety shoes increased by 9% and PPE sales increased by 5% compared to 2017. Sales in office equipment increased by 21%. The implementation of the administrative software professionalization process combined with improved management capacity and dedicated support staff at VSH Trading and VSH-UNITED (Guyana) has positioned the trading segment to further improve operating income and results for the coming years.

VSH FOODS** (VSH share position 2018: 56.01%, share position May 2019: 63.13%), which includes the production and distribution of margarine, butter and shortening. VSH FOODS proudly celebrated its 55th anniversary on 16 October 2018. This anniversary celebration commemorated the "Samen 100 jaar/ Together 100 years" anniversary of two brands that stood the test of time - Yellow Bird/Gelebek (55 years) and Golden brand (45 years).

Operating income is stated after deduction of cost of packaging and raw materials. Segment operating income in 2018 was 13.4% higher than 2017 and amounted to SRD 17,897,762 (2017: SRD 15,779,357). Segment operating result in 2018 was 0.6% lower than 2017 and amounted to SRD 3,249,723 (2017: SRD 3,269,253).

Weak consumer spending power continues to effect local sales and the retail segment showed a volume decline of 3.3% compared to 2017. The food service segment showed a volume increase of 4.4%. The 2018 overall domestic volume increased by 0.5% in 2018. Exports volumes 2018 increased by 2.0% compared to 2017 and contributed 27.4% of total sales volume. Interesting to note is the combined Jamaica and Trinidad volume growth of 22.2% in 2018 compared to 2017. Commercial challenges forced a retreat from the Guyana market in 2018 but product development activities have been on going and exports will resume in 2019.

The local market conditions continue to underscore the importance of exports. Overall 2018 sales revenues increase of 4.4% was realized for the most part by export revenues increase of 10.2% compared to 2017. In 2018 export contributed 18.6% to total revenues.

Continued investments in modernizing the production facility effected productivity negatively in 2018. The successful installation of a new packaging line in 2018 will be followed by steam room and oil transfer system improvements to be completed in 2019. Smart planning allowed for equipment upgrades while maintaining production to meet sales requirements.

Food safety is of paramount importance to VSH FOODS and in October 2018 the ISO 22000:2015 Food Management System certificate was renewed ensuring that the necessary controls are in place for possible food safety hazards and guaranteeing safe production and distribution.

The management team backed by 55 years' experience in manufacturing quality foods products has confidence in their strong market potential and

understands the need for continued administrative and production improvements to ensure revenue growth in these ever changing and competitive local and export food markets.

Detergents

N.V. Consolidated Industries Corporation

(VSH share position 2018: 60.15%, VSH share position May 2019: 60.40%) manufactures a wide range of industrial/household detergents and plastic packaging materials. The Company's products command an important share of the local and regional markets.

Operating income is reported after deduction of cost of packaging and raw materials. Segment income decreased by 0.7% in 2018 and amounted to SRD 36,552,458 (2017: SRD 36,793,328). Segment operating result was 68.7% lower than 2017 and amounted to SRD 1,646,872 (2017: SRD 5,264,040).

Production volumes increased by 3.1% in 2018 to 6,919 metric ton compared to 6,711 metric ton in 2017. Unexpected price increases in key raw materials negatively affected segment income and operating results. Increase in sales by 5.6% -SRD 77.5 million compared to 2017 - SRD 73.4 million were offset by higher cost of sales of +11.8% -SRD 41.0 million compared to 2017 - SRD 36.6 million. By implementing adjusted pricing strategies in the second half of the year the company was able to mitigate some of the effects of these significant cost of sale increases. Continued weak consumer spending and influx of substandard products continues to negatively affect pricing strategies and ultimately sales margins in Suriname and in regional markets.

- Exports sales increased by 5.7% in 2018
- Powder detergent production volume decreased by 1%
- Liquid detergent production volume increased by 5%
- Production quantities in the plastic blow molding increased by 10%

The challenging raw material pricing and overall weak market conditions during the year 2018 motivated the company to implement new and creative ways to innovate and focus on profitability for specific product groups both locally and in the regional markets. Great effort was put into the launch of the new Ozon powder detergents. The investments made in the automated powder packaging equipment and a second blow molding machine will support improved production volume capacity.

Risk Management - the ISO 9001:2015/14001:2015 certified systems in place, were audited and re-certified in October 2018 and address operational and environmental risk. Yearly internal appraisals session support competitive, economic and strategic risks discussion and mitigation.

The highly motivated CIC organization with strong established brands is focused on developing product and production strategies to ensure increased profitability.

Steel

N.V. VSH Steel provides engineering services and produces prefabricated steel structures for the construction industry in Suriname, the Caribbean and Central America. Operating income is reported after deduction of cost of raw materials. Segment operating income improved in 2018 to SRD 7,384,784 (2017: SRD 4,360,485).

Segment operating results amounted to a profit of SRD 49,045 (2017: loss SRD 2,850,679). Production volume for the year amounted to 1,117 MT (2017: 208 MT) of which 37.0% was export.

During the year 2018 VSH Steel management in consultation with VSH United (Holding) management did an overall review of the existing business model supported by financial performance data for the period 2008-2018 and presented capital expenditures (CAPEX) requirements 2019 to modernize the production facility that dates back some 35 years. In analyzing the VSH Steel financial performance in the period 2008-2018 it was found that the company managed to turn a profit in only (4) four of these 10 years. Additionally, these profitable years did not achieve the targeted Return on Capital Employed (ROCE). The consolidated financial results of these 10 years also ended up with an overall loss. VSH Steel management and VSH United (Holding) management agreed that the business model in place was financially not effective in competing in the Suriname and regional business environment. The production facility infrastructure was outdated and renewed investments in improvements to a unsuccessful business model without prospects for return on investment was unacceptable.

It was agreed that VSH Steel management will prepare a feasibility on the strengths of offering VSH Steel engineering services and to explore outsourcing steel frame production to keep the VSH Steel brand alive. In the month December it was announced that the VSH Steel production department would complete on-going fabrication work and cease production activities by 1 June 2019. A management feasibility study is being prepared to re-think the business model based on the strong brand developed in the past 35 years.

It is important to report that we were successful in placing the vast majority of the production employees at other VSH companies and with strategic partner companies in Suriname. Additionally, we can report that first quarter 2019 financial results were positive. VSH Steel organization has a proven track record of delivering quality engineering services and steel frames. VSH Steel management in consultation with VSH United (Holding) is committed to consider all options in developing an alternative and more effective business model in support of our strong brand.

The project to build a modern office building on our last vacant property in Paramaribo at Van 't Hogerhuysstraat is on hold pending improvement of economic conditions. In line with our efforts to support the VSH Group strategic objectives, the company continues to explore real estate opportunities whether in developing the existing strategic lots at Paranam area or possible new investments. Outlook

The expectation is that the Suriname economy is to grow by 2.2%* in 2019 (GDP) and by 2.5%* in the election year 2020 (GDP). Projected economic growth continues to depend on the traditional oil and mining sector and remains a concern. Little has been done to strengthen local investor confidence. Concerns about monitoring capacities of the implementation of the Financial Statements Act undermines its effectives in improving conditions for a level playing field. Suriname will be audited by the CFATF – Caribbean Financial Action Task Force in 2020. Recommendations issued during the last audit to resolve strategic deficiencies identified to combat money laundering and the financing of terrorism highlights the effects of informal sector on the Suriname economy.

The VSH Group of Companies will continue to build on the success of our market expansion and export growth strategies. Professionalization of our internal support services by expanding use of modern automated business processes and manufacturing systems will be further implemented. Deferred tax liabilities

These are tax liabilities arising from the differences between valuation for commercial and for taxation purposes. In 2002, 2003, 2004 and 2005 requests for the application "accelerated depreciation" according to the investment code 2001 were submitted by VSH FOODS to the Ministry of Finance for part of the investments made in PP&E from 2002 to 2005. In the financial statements it is assumed that part of the requests will be granted. This assumption is based on the approvals and rejections received from the Ministry of Finance. As a result of the application of the "Iron Inventory" valuation method the inventory has been written down this year based on the actual situation. A tax rate of 36% is used for the determination of this liability.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Group and of its financial performance and its cash flows for the year then ended in accordance with generally accepted accounting principles.

Basis for Opinion

We conducted our audit in accordance with generally accepted auditing standards. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Group with the ethical requirements that are relevant to our audit of the financial statements, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Emphasis of Matter

We draw attention to Note 10 to the financial statements which describes that the Financial Statements 2018 of the Associate have to be adopted by the Annual General Meeting of Shareholders of the Associate on June 14, 2019. Our opinion is not modified in respect of this matter.

Other Information

Management is responsible for the other information. The other information comprise the information included in the Group's 2018 Annual Report, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the 2018 financial statements, our responsibility is to read the other information, and in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the procedures performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements Management is responsible for the preparation and fair presentation of the financial statements in accordance with generally accepted accounting principles, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

INDEPENDENT AUDITOR'S REPORT

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements

As part of an audit in accordance with generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.
